CAMPUS D'ALCOI

THE PROJECT

At Universitat Politècnica de València Campus d'Alcoi we have developed some workshops applying the studio work methodology over the past three years. The aim of these activities is that students can understand and assimilate the different stages of the

project from, research to ideation, execution and communication. The whole process is mentored by a professional design studio and Juan Francisco Picó Silvestre as the reference lecturer from the university.

This year, the workshop has evolved around the home office concept, under the name DOMOFFICE, with the guidance of PerezOchando Studio and the collaboration of the furniture companies Actiu and Mayans,S.L.

THE COLLECTION

The idea in mind is a human centered office, without fixed places, that allows you to move around and generates adaptive situations throughout the day. A dynamic office that escapes excessive comfort and triggers both interaction and an enriching teamwork atmosphere.

CIRCLE ACC- SORIES

**Accessories Set with
the same circle base:**
the forms are for notes
support, support for ipad,
cable winding and little
storage

Materials

Metal and wood

XY LAMP

**Minimal work lamp
and lighted on with a
gentle turn. The base
is secured to the table
by a suction cup which
allows the lamp to be
more stable**

Materials
Metal and plastic

D O M O F F I C E

SLIDE DESK

Materials

Metal and wood

**Desktop that slides to get
double work space.**

**The base is made of
marine plywood with a
hole for the computer,
the metal sliding surface
slides on an axis allowing
the expansion of space
with a gentle twist**

D O M O F F I C E

DUO ARMCHAIR

Duo armchairs with triangular modules were you can sit when folded and lie down when deployed. The chair is upholstered and easily fixed by a metal hook

Materials

Upholstery and metal

BI- STOOL

Stool formed by two parts that allow a dual function. On the one hand, it serves as a conventional stool; on the other hand as an auxiliary table and footrest for a much more relax position.

Materials

Metal and wood

D O M O F F I C E

PAPER SHELVES

**Paper sculpture shelf
that stores documents
and office papers. The
shelf evokes a piece
of origami. When the
papers are placed it
merges with them to
look like a piece made
entirely of paper.**

Materials
Metal

VIEW SEPARATOR

**Separator panel that
plays with the shape
you see depending on
the perspective.
Depending on the
viewing angle and
position you can see
circles or ovals.**

Materials

Upholstery and metal

MINIMAL DESK

Wall desk for
small spaces. Its
shape allows you
to store small
objects and work
simultaneously with
the sliding tray

Materials

Wood and metal
